

**Clean water  
for everyone.**

WATER PROCESSING SERVICES  
PROFESSIONAL & DOMESTIC FILTERS

# The Company

---

Our vision is to protect people's health by ensuring clean, drinking water for everyone.

Energy Water was established in 2011.

The company is active in the area of water processing & the trading of water filters, with the aim of improving its quality, through filtering systems.

Today we are a dynamic, rapidly developing company, a basic pillar of its sector in Greece, which imports and distributes on the related market, quality products from the largest and most reputable manufacturers.

Our products range from small domestic filters to large professional systems for public and private facilities, such as hospitals, clinics, microbiology labs, hotels,

restaurants, cafes, bakeries, food production labs, etc.

The company boasts 900m<sup>2</sup> of warehouse space to directly meet customers' requirements.

Focusing on the need of clean drinking water for every home, Energy Water offers effective and comprehensive solutions related to all water problems.

Following cutting-edge technological developments, we are continuously adding to our product range, while with our experienced personnel the quality and effectiveness of the installation is guaranteed. And all this, at the most competitive prices in the market.

# 06 reasons to choose Energy Water

Our basic objective is to improve the quality of water through processing & filtering systems

## 01

### Respect towards people & the environment

In the core of our company's philosophy is the respect towards people and the environment. For that reason, we only have certified, environmentally friendly, high-quality products, while we are actively supporting environmental actions and social protection.

## 02

### Dynamism and specialisation

With comprehensive organisation and ongoing training, we are always in the forefront of our sector. Our knowledge and experience in water quality issues is the best guarantee which helps us strengthen our corporate profile, set on growth and promote effectively our products.

## 03

### Quality and reliability

We are striving to promote consistency, honesty and credibility throughout our services. We are confident that this is the only way to become trustworthy towards our associates and increase mutual benefit.

## 05

### International presence

With our sights firmly set on the international markets we are extending our collaboration with customers as well as suppliers abroad. Energy Water is already active in the construction of water processing systems and the trade of water filters in the following countries: Cyprus, Romania, Kosovo, FYROM, Bulgaria, Albania.

## 04

### Continuous development

Continuous updating in all fields, stable monitoring of developments at an international level, as well as the knowledge and experience we possess allows us to meet with total success our market's needs and offer the most competitive prices.

## 06

### Always at your service

At energy water we are focused on the effective customer support, both in terms of the technological know-how as well as the after-sales service we provide. We are always at our client's disposal, happy to support their requirements.

## The Team

---

We believe in dynamic teams.  
For that reason, we select experienced  
and highly specialized staff with  
collaborative spirit.

Energy Water's positive growth had and still has one  
basic cause.

People with common philosophy, who love their subject  
and want to share the benefits of these developments.  
People who have a vision and professional ethos,  
who respect the customer and understand the market  
and its goals.

This strong team forms the base of our development.  
Our specialised and specially trained staff, armed with the  
know-how, innovation, professionalism and ongoing  
improvement, always give their best to offer immediate  
service and continuous updates.

# Areas of Activity

---

## HEALTH SECTOR

Energy Water specialises in the installation and maintenance of water processing systems in Renal Dialysis Units (RDU), having undertaken various projects throughout Greece.

We also take on disinfections and sterilisations of networks, as well as the production of 'ultra-pure' water for all laboratory analyses, with a presence in biochemical, immunology and microbiological laboratories, public and private.

The company has the corresponding international certifications and the appropriately trained staff, always available to serve its customers.
